a seamless integration into your building and into your lifestyle

## Background

Mavis had been living in her 2 storey home in Beacon Hill for over 55 years, and, now in her 80s, was finding it increasingly difficult and hazardous to carry common items from floor to floor. To ease the burden of carrying heavy loads between floors, Mavis contacted Unique Integrations to see if our dumbwaiters offered the solution .

## Approach

Our recommendation to Mavis was the installation of an Easy Series Dumbwaiter. This model allowed Mavis to safely transport her goods from the garage to kitchen with the press of a button. With careful planning, the dumbwaiter was designed to seamlessly integrate into the kitchen.

## Challenges

The house was constructed in the 1970's and the kitchen was due for renovation. The new kitchen was to be relocated to a more spacious back room which was situated directly over the garage. This allowed for the dumbwaiter shaft to be constructed in the garage and up into the kitchen. The dumbwaiter opening was ideally located near the walk-in pantry and provided easy front opening access.

## Results

Quite a few years have passed and Mavis is thrilled with the results. The Easy Series Dumbwaiter has given a new lease of life to Mavis and her beloved family home. Mavis now lives without the fear of falling down stairs under the weight of groceries or laundry.
