convenience

a seamless integration into your building and into your business

Background

A popular Lygon Street restaurant undertook a full renovation and installed a dumbwaiter to service the upstairs dining and function room.

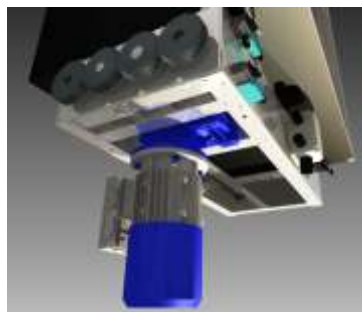

Approach

The dumb waiter had to fit with the decor specified by San Churro. It was decided that the Premium Series (DW4000-100) would be the best fit for their requirements.

Challenges

The commercial application required fitting the new dumbwaiter within a 6 week time frame.

Results

The dumbwaiter has become a vital tool for the staff. It quietly and reliably transports the food and the drinks without spilling a drop. It has eliminated the hazardous task of carrying heavy goods and meals upstairs to the dining area.
