convenience

a seamless integration into your building and into your lifestyle

Background

This luxury house on the Mornington Peninsula, Victoria required a 2 level dumbwaiter, so the client could simply drive their car into a ground floor garage, open their car boot & transfer their luggage, groceries & wine supplies into the dumbwaiter & send them directly to the kitchen / pantry

Approach

Our recommendation was to use an AV4000PLC 2 Level Dumbwaiter, with 180 degree openings so items could be loaded on the south side & be removed on the first level on the north side. Lifting capacity was rated at 100 Kilograms & the car was big enough to handle a suitcase. (800 mm. W x 600 D x 1000 mm. H)

Challenges

Not a lot space was available to fit a dumbwaiter that could handle the items required to be serviceable, especially in the pantry/kitchen area. The rack & pinion design made it possible for the dumbwaiter to work with minimal space.
